A Better Vision for Events
Upgrade Your Events Experience with Freestyle

cosneta®
liberating technology

Every year 2 billion people just like you around the world attend over 29 million meetings, events, and conferences.
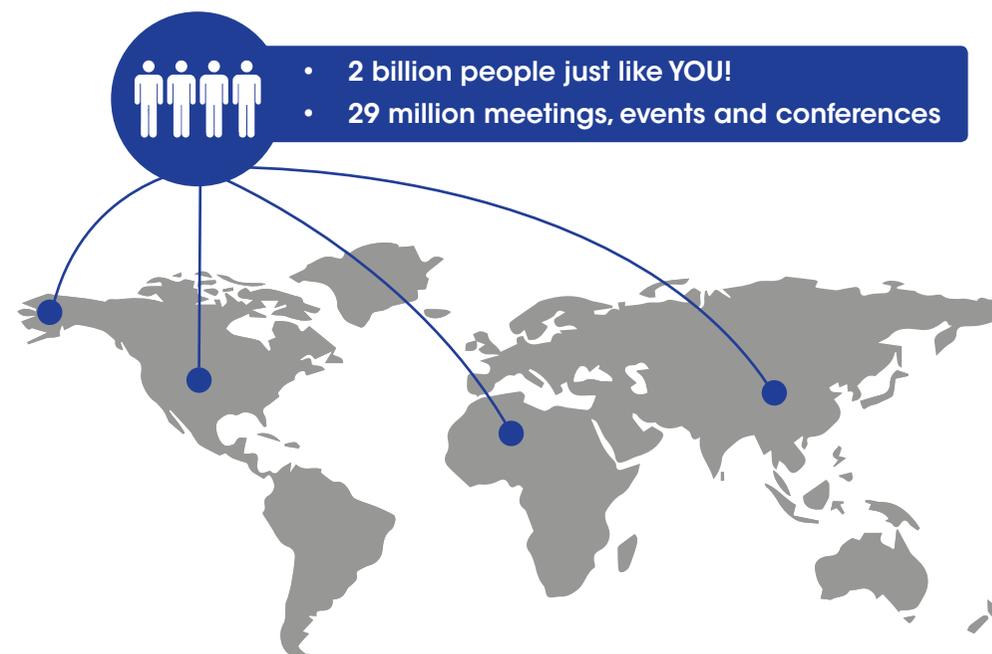

And, just like you, they attend these conferences seeking new information, self-improvement, and a shot of motivation. What you don't want is to squint at a screen that's too far away, or scribble notes on printouts that will be misplaced, or even forget everything you've been presented the very next day.

Thanks to Freestyle from Cosneta, those problems are a thing of the past.

Our software allows you to experience presentations at your own pace on your own Wi-Fi enabled device, quickly and easily annotate slides, and collaborate with your colleagues in real time.

We make the content interactive and actionable. You will experience captivating, memorable, and most importantly, valuable events, and you'll leave primed and ready to put what you've learned into practice.

Now you can **SEE, SHARE, and SAVE.**

- **2 billion people just like YOU!**
- **29 million meetings, events and conferences**

YOUR EXPERIENCE

No need to scramble to note down information. Experience presentations at your own pace.

OUR SOFTWARE

Easily annotate slides and collaborate with colleagues. We make the content interactive and actionable.

DID YOU KNOW?: Within 24 hours, you will typically have forgotten on average 50% of the information you have been presented. After one week that can climb to 90%. (Source: Ebbinghaus, 1885)

How Does Freestyle Work?

It couldn't be easier to use Freestyle at your next event. Simply download our free app onto your mobile device and then find and securely connect to the presentation with the correct meeting name and password via our single touch connection.

It all seamlessly works across Wi-Fi, elevating the event to the interactive experience you deserve as today's modern delegate.

And there's lots more to explore!

Key Software Features

Freestyle truly is the easiest way to share content to tablets, mobile phones and PC's.

Using Freestyle, delegates can:

Connect with a single touch secure log on

Zoom and view – zoom in and out

Overlay – see-through screen to display any document or application

Presentation control – control from any device

Annotate - write, draw, markup, highlight, type, voice commands (if your device supports this)

Tools - change colour, pen type, line thickness, choice of shapes, whiteboard backgrounds

Text – point on the screen and type

Save - snapshot, video or automatic saving

Virtual digital whiteboard – choose background colours and get creative to your hearts content

Live stream to any number of devices
